10.1 Upon dissolution of the American Gotland Sheep Society, the Board of Directors shall, after paying or making provision for the payment of all liabilities of the association, dispose of all assets of the association exclusively for the purposes of the association in such manner, or to such organization or organizations organized for charitable, educational, or scientific purposes as shall at the time qualify as an exempt organization under section 501 (c) (3) or the Internal Revenue Code of 1954 (or corresponding provisions of any future United States Internal Revenue Law) as the Board of Directors shall determine.

UPGRADE PROCEDURES

Object

The American Gotland Sheep Society (AGSS) supports the development of Gotland Sheep that meet or exceed the AGSS Standard. The development consists of the original crossing of specific non-Gotland Foundation ewes with Gotland rams through imported semen, and breeding subsequent generations using increasing percentage Gotland animals and imported Gotland semen.

I. Foundation Ewes

The Foundation ewes used in the first cross must be purebred ewes from the following ten (10) breeds, or ewes produced from crossing these breeds with themselves and/or with Gotlands. The percentage of Gotland cross foundation ewes will not be recognized and their first cross AI offspring will be recorded as 50%. No other breeds or crossbred breeds are allowed to have their progeny recorded or registered with the AGSS. Any animals born prior to 7/1/2009, do not have to meet this criteria as the AGSS was formed in July of 2008, and any preexisting animals and /or breedings shall grandfather

into the Gotland registry. However, any offspring of less than 50% Gotland foundation ewes must be of a higher percentage than the dam to be recognized by the AGSS.

- Northern Short tailed Breeds
 - Shetland Sheep (S)
 - Icelandic Sheep (I)
 - Finnsheep (N)

- Longwool Breeds
 - Wensleydale (W)
 - Lincoln (L)
 - Cotswold (C)
 - English Leicester (E)
 - Border Leicester (B)
 - Bluefaced Leicester (F)
 - Teeswater (T)

Determining Percentage

The sire and dam Gotland percentages are added together and divided by two, and the number obtained will contain two numerals after the decimal point. The resulting number is the percentage Gotland of the offspring.

For example, a 62.75% ewe bred to an 87.75% ram would produce offspring that are recorded as 75.25% instead of 75%.

II. Registration Procedures

Only Active AGSS members in good standing may record, register or transfer sheep with the Association.

No animal older than 24 months of age may be registered/recorded with the American Gotland Sheep Society. Any animals that have attained 24 months of age before March 1, 2014, shall have a 60 day grace period to be registered/recorded.

Registrations fees will be doubled on animals not registered/recorded before they reach 18 months of age.

An animal is eligible to be included in the American Gotland Sheep Society program as follows:

1. Foundation ewes carry the prefix "F".
2. All Foundation ewes must be listed with the AGSS, and will have up to a two letter suffix assigned (shown in Item II) representing their breed or major breeds if a crossbred. If applicable, the first letter is the breed of the sire and the second letter is the breed of the dam.

3. Recorded stock carry the prefix "R"
4. All Recorded stock born after 7/01/2009 must be no less than 50% Gotland unless a descendant of a grandfathered animal born before 7/01/2009. All recorded stock born after 7/01/2009 and not a descendent of a grandfathered animal will be no less than 50% Gotland with ewes up to 74% Gotland and rams up to 86% Gotland. First cross lambs born to foundation ewes and sired by use of imported 100% Gotland semen or by AGSS-registered North American Purebred rams of 96.5% or greater Gotland DNA will be recorded as 50% Gotland. Canadian breeders may use rams of 93.5% or greater Gotland DNA to produce first-cross 46.75% recordable animals. Successive generations will be recorded or registered if they come from parents who are recorded or registered with the AGSS.
5. Canadian breeders are allowed to use natural breeding that results in no less than 43% progeny and only Canadian born females may be recorded in this manner. This will be allowed for animals born by December 31, 2016.
6. Percentage of Gotland DNA in Canadian Gotlands descended from foundation ewes sired by AGSS rams R1178 and R1168 will be calculated based on actual percentage Gotland in these foundation ewes, and not adjusted to zero. These calculations are in response to registry errors caused by Accu Register and discovered in October 2017; this amendment allows these animals and their progeny to be recorded or registered as applicable and to retain the percent Gotland they held in the registry prior to the error being reported.
7. Less than 50% ewes but not less than 25% ewes may be grandfathered into the records provided they are born before 7/1/09 and recorded before 7/1/10. Their offspring may be recorded as long as they are a higher percentage than the dam and are recorded before 7/1/2012. After that date all animals recorded with the association must be 50% or higher.
8. Recorded Animals need not adhere to the AGSS Standard, although greater merit shall be given to animals that most closely resemble the AGSS standard.
9. Registered Gotland stock carry no prefix
10. Ewes at least 75% Gotland blood, and Rams at least 87% Gotland blood may be registered
11. Sheep submitted for AGSS Registered status shall meet the breed standard set forth by the American Gotland Sheep Society. Otherwise worthy sheep who do not meet the AGSS standard may be recorded with the Association and used in breeding programs. This would include sheep with patterned fleece, fleece color other than gray, sheep with atypical tails, horns or excessive white spots, but not sheep with jaw deformities, undescended testicles or other known genetic abnormalities.
12. Gotland rams whose semen is imported for use in North American Gotland breeding programs will be registered with AGSS at no charge. These rams will have the suffix "AI".

13. When requesting AGSS registration for an AI ram, the Semen Importer is responsible for providing the AGSS Secretary with:
 - a. A three-generation pedigree.
 - b. Proof of registration with the appropriate Gotland Breeder's Association in the ram's country of origin.
 - c. The ram's Codon 171 DNA. (QQ, QR, and RR are acceptable, but must be known.)
 - d. Any AI ram being presented for registration must be 100% Gotland.
14. All animals that are the product of the LAI procedure must have a signed breeding certificate signed by the LAI technician performing the LAI procedure to be recorded or registered with the AGSS.
15. At some as yet undetermined future dates, the registry may be closed to further additions of foundation ("F") and recorded ("R") animals.
16. Registered Gotland sheep with a genotype of QR at codon 171 will be designated "Ram or Ewe of Merit".
17. Registered Gotland sheep with a genotype of RR at codon 171 will be designated "Elite" rams or ewes.
18. If the Codon 171 status is known at the time of registration, it will be noted on the registration.
19. The American Gotland Sheep Society will register Gotland sheep who are registered with another Gotland registry provided ALL of the following conditions are met:
 - a. The owner provides a four-generation pedigree.
 - b. The animal to be registered is not the first-generation progeny of artificial insemination using imported semen from rams not approved by AGSS.
 - c. No animal shown on the four-generation pedigree is the product of genetics imported to the United States from New Zealand.
 - d. The animal meets the AGSS standards for recording or registration.

Examples of Foundation, Recorded, and Registered Numbers

Prefix	Number	Suffix	Type	Breed	Percentage
F	123456	S	Foundation Ewe	Shetland Sheep	
R	123456	50	Recorded Animal	Gotland	50%
	123456	88	Registered Animal	Gotland	87%
	123456	AI	Imported Semen	Gotland	100%

III: Defining North American Purebred Percentages

When calculating the percentages of offspring of North American Purebred Gotlands (which must be 96.5% or higher) the rams will be considered 100% and the ewes will retain their actual percentage. Example: A 96.5% ewe bred to a 96.5% American Purebred ram would result in offspring that were 98.25% (100% for the ram and 96.5% for the ewe).
